Icc/Ashrae 700-2015 National Green Building Standard-Nahb 2016 The ICC/ASHRAE 700-2015 National Green Building Standard(TM) (NGBS) has been approved by the American National Standards Institute for all

types of sustainable residential construction. A collaborative effort of the International Code Council, ASHRAE and the National Association of Home Builders, NGBS outlines a variety of green practices that can be incorporated into new homes and multifamily buildings, as well as hotels, dormitories and land developments. The Standard also delivers stand-alone chapters for both home remodeling and additions and renovations of multifamily buildings. The green practices address site and lot design, preparation and development; resource, energy and water efficiency; indoor environmental quality; and operation, maintenance and building owner education. Four levels--Bronze, Silver, Gold and Emerald--enable residential professionals to integrate sustainability and high performance at a level most appropriate for their businesses and specific housing markets. Changes for the 2015 Edition The 2015 edition incorporates changes that better align the NGBS with the I-codes, expands the application of innovative practices and builds upon years of building and certifying to NGBS. Some of the more notable updates

Editing Digital Video-Robert M. Goodman
2002-10 Rebecca Harding Davis was a prominent author of radical social fiction during the latter half of the nineteenth century. In stories that combine realism with sentimentalism, Davis confronted a wide range of contemporary American issues, giving voice to working women, prostitutes, wives seeking divorce, celibate utopians, and female authors. Davis broke down distinctions between the private and the public worlds, distinctions that trapped women in the ideology of domesticity. By engaging current strategies in literary hermeneutics with a strong sense of historical radicalism in the Gilded Age, Jean Pfaelzer reads Davis through the public issues that she forcefully inscribed in her fiction. In this study, Davis's realistic narratives actively construct a coherent social work, not in a fictional vacuum but in direct engagement with the explosive movements of social change from the Civil War through the turn of the century.

VMware vSphere 6.5 Host Resources Deep Dive-Frank Denneman 2017-06-20 From the author of the vSphere Clustering Deep Dive series - The VMware vSphere 6.5 Host Resources Deep Dive is a guide to building consistent high-performing ESXi hosts. A book that people can't put down. Written for administrators, architects, consultants, aspiring VCDX-es and people eager to learn more about the elements that control the behavior of CPU, memory, storage and network resources. This book shows that we can fundamentally and materially improve the systems we're building. We can make the currently running ones consistently faster by deeply understanding and optimizing our systems. The reality is that specifics of the infrastructure matter. Details matter. Especially for distributed platforms which abstract resource layers, such as NSX and vSAN. Knowing your systems inside and out is the only way to be sure you've properly handled those details. It's about having a passion for these details. It's about loving the systems we build. It's about

understanding them end-to-end. This book explains the concepts and mechanisms behind the physical resource components and the VMkernel resource schedulers, which enables you to: Optimize your workload for current and future Non-Uniform Memory Access (NUMA) systems. Discover how vSphere Balanced Power Management takes advantage of the CPU Turbo Boost functionality, and why High Performance does not. How the 3-DIMMs per Channel configuration results in a 10-20% performance drop. How TLB works and why it is bad to disable large pages in virtualized environments. Why 3D XPoint is perfect for the vSAN caching tier. What queues are and where they live inside the end-to-end storage data paths. Tune VMkernel components to optimize performance for VXLAN network traffic and NFV environments. Why Intel's Data Plane Development Kit significantly boosts packet processing performance.

Cognitive Science-Jay Friedenber
g 2015-10-16
In Cognitive Science 3e Friedenber and

Silverman provide a solid understanding of the major theoretical and empirical contributions of cognitive science. Their text, thoroughly updated for this new third edition, describes the major theories of mind as well as the major experimental results that have emerged within each cognitive science discipline. Throughout history, different fields of inquiry have attempted to understand the great mystery of mind and answer questions like: What is the mind? How do we see, think, and remember? Can we create machines that are conscious and capable of self-awareness? This books examines these questions and many more. Focusing on the approach of a particular cognitive science field in each chapter, the authors describe its methodology, theoretical perspective, and findings and then offer a critical evaluation of the field. Features: Offers a wide-ranging, comprehensive, and multidisciplinary introduction to the field of cognitive science and issues of mind. Interdisciplinary Crossroads" sections at the end of each chapter focus on research topics that have been investigated from multiple perspectives, helping students to

understand the link between varying disciplines and cognitive science. End-of-chapter “Summing Up” sections provide a concise summary of the major points addressed in each chapter to facilitate student comprehension and exam preparation “Explore More” sections link students to the Student Study Site where the authors have provided activities to help students more quickly master course content and prepare for examinations Supplements: A password-protected Instructor’s Resource contains PowerPoint lectures, a test bank and other pedagogical material. The book’s Study Site features Web links, E-flash cards, and interactive quizzes.

economic future, she is taken to William's camp when her estate is sacked on the eve of the Battle of Hastings. She later identifies Harold's body on the battlefield and her youngest son becomes a Norman hostage. Elditha avoids an arranged marriage with a Breton knight by which her son might or might not be given into his care. She makes her own choice and sets out through strife-torn England to seek help from her sons in Dublin. However, events again overtake her. Harold's mother, Gytha, holds up in her city of Exeter with other aristocratic women, including Elditha's eldest daughter. The girl is at risk, drawing Elditha back to Exeter and resistance. Initially supported by Exeter's burghers the women withstand William's siege. However, after three horrific weeks they negotiate exile and the removal of their treasure. Elditha takes sanctuary in a convent where eventually she is reunited with her hostage son. This is an adventure story of love, loss, survival and reconciliation.

Vector Calculus-Susan Jane Colley 2012 Normal 0 false false false Vector Calculus, Fourth Edition, uses the language and notation of vectors and matrices to teach multivariable calculus. It is ideal for students with a solid background in single-variable calculus who are capable of thinking in more general terms about the topics in the course. Building Wireless Community Networks-Rob Flickenger 2003 Building Wireless Community Networks is about getting people online using wireless network technology. The 802.11b standard (also known as WiFi) makes it possible to network towns, schools, neighborhoods, small business, and almost any kind of organization. All that's required is a willingness to cooperate and share resources. The first edition of this book helped thousands of people engage in community networking activities. At the time, it was impossible to predict how quickly and thoroughly WiFi would penetrate the marketplace. Today, with WiFi-enabled computers almost as common as Ethernet, it makes even more sense to take the next step and network your community using nothing but freely available radio spectrum. This

book has showed many people how to make their network available, even from the park bench, how to extend high-speed Internet access into the many areas not served by DSL and cable providers, and how to build working communities and a shared though intangible network. All that's required to create an access point for high-speed Internet connection is a gateway or base station. Once that is set up, any computer with a wireless card can log onto the network and share its resources. Rob Flickenger built such a network in northern California, and continues to participate in network-building efforts. His nuts-and-bolts guide covers: Selecting the appropriate equipment Finding antenna sites, and building and installing antennas Protecting your network from inappropriate access New network monitoring tools and techniques (new) Regulations affecting wireless deployment (new) IP network administration, including DNS and IP Tunneling (new) His expertise, as well as his sense of humor and enthusiasm for the topic, makes Building Wireless Community Networks a very useful and readable book for anyone

interested in wireless connectivity.

A Course in Modern Mathematical Physics-
Peter Szekeres 2004-12-16 Publisher Description

WIG Craft and Ekranoplan-Liang Yun
2009-12-03 In the last half-century, high-speed water transportation has developed rapidly. Novel high-performance marine vehicles, such as the air cushion vehicle (ACV), surface effect ship (SES), high-speed monohull craft (MHC), catamaran (CAT), hydrofoil craft (HYC), wave-piercing craft (WPC) and small water area twin hull craft (SWATH) have all developed as concepts, achieving varying degrees of commercial and military success. Prototype ACV and SES have achieved speeds of 100 knots in at calm con- tions; however, the normal cruising speed for commercial operations has remained around 35-50 knots. This is partly due to increased drag in an average coastal s- way where such craft operate services and partly due

to limitations of the propulsion systems for such craft. Water jets and water propellers face limitations due to cavitation at high speed, for example. SWATH are designed for reduced motions in a seaway, but the hull form is not a low drag form suitable for high-speed operation. So that seems to lead to a problem - maintain water contact and either water propulsion systems run out of power or craft motions and speed loss are a problem in higher seastates. The only way to higher speed would appear to be to disconnect completely from the water surface. You, the reader, might respond with a question about racing hydroplanes, which manage speeds of above 200 kph. Yes, true, but the power-to-weight ratio is extremely high on such racing machines and not economic if translated into a useful commercial vessel.

Statistical Inference via Data Science: A ModernDive into R and the Tidyverse-Chester Ismay 2019-12-23 Statistical Inference via Data Science: A ModernDive into R and the Tidyverse

provides a pathway for learning about statistical inference using data science tools widely used in industry, academia, and government. It introduces the tidyverse suite of R packages, including the ggplot2 package for data visualization, and the dplyr package for data wrangling. After equipping readers with just enough of these data science tools to perform effective exploratory data analyses, the book covers traditional introductory statistics topics like confidence intervals, hypothesis testing, and multiple regression modeling, while focusing on visualization throughout. Features: ● Assumes minimal prerequisites, notably, no prior calculus nor coding experience ● Motivates theory using real-world data, including all domestic flights leaving New York City in 2013, the Gapminder project, and the data journalism website, FiveThirtyEight.com ● Centers on simulation-based approaches to statistical inference rather than mathematical formulas ● Uses the infer package for "tidy" and transparent statistical inference to construct confidence intervals and conduct hypothesis tests via the bootstrap and

From Power Sharing to Democracy-Sid Noel
2005-09-22 From Power Sharing to Democracy examines the theoretical underpinnings of power sharing as a means of achieving sustainable democratic governance. Contributors examine key areas, including Afghanistan, Cyprus, Kosovo, Macedonia, and South Africa, where power-sharing constitutions and political institutions have been employed or proposed. They provide an in-depth exploration of consociationalism, under which the previously warring ethnic communities are guaranteed a proportionate share of political offices and protection of their vital interests, and federalism, which provides for substantial territorial autonomy in cases where the communities are

Eco-Fascists-Elizabeth Nickson 2012-10-16
Forty million Americans have been driven from their lands and rural culture is being systematically crushed, even as wildlife, forests, and rangelands are dying. Journalist Elizabeth Nickson's investigations into these events have revealed a shocking truth: rather than safeguarding our environment, radical

conservationists are actually destroying our natural heritage. In *Eco-Fascists*, Nickson documents the destructive impact of the environmental movement in North America and beyond, detailing the extreme damage environmental radicals in local and national government agencies are doing to the land, the ecosystems, and the people. Readers of Alston Chase's *Playing God in Yellowstone* and *In a Dark Wood*, and anyone who is deeply concerned about global warming and the environment must read Elizabeth Nickson's *Eco-Fascists*.

2020-10

The Lakeside Annual Directory of the City of Chicago- 1917

Mau Moko-Ngahuia Te Awekotuku 2007 In the traditional Māori world, the moko, or facial or body tattoo, was a sign of great mana and status. Male warriors wore elaborate tattoos on their faces and bodies; women took more delicate chin tattoos. After almost dying out in the twentieth century, Māori tattooing is now experiencing a powerful revival, with many young Māori wearing the moko as a spectacular gesture of racial pride. This examines the use of tattooing by traditional and contemporary Māori and links it to other aspects of Māori culture. Gender issues are considered along with tattooing techniques both old and new. The book features case studies

of modern Māori who have made a personal decision to be tattooed; the role and status of the tattooers; exploitation of the moko in popular culture around the world by figures such as rock singers and football players.
